

EMI 9.1™ Controller

RELIABLE SOLUTION. UPGRADED PERFORMANCE.

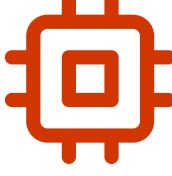

ASME A17.5 COMPLIANT | CSA B44 COMPLIANT | NEC 620 SECTION II COMPLIANT

Why Installers Choose EMI 9.1

-  **Drop-In Modernization**
Compatible with thousands of existing installations.
-  **Familiar Platform**
Delivers all the things you loved with updates that make it better, fully backed by EMI Porta technical support.
-  **Enhanced Diagnostics**
Features enhanced event logging to assist technicians in the field.
-  **Improved Architecture**
Built on an updated electronics platform with an improved firmware architecture.

The Next Evolution

-  **Backward Compatible**
Maintains existing field-proven hardware architecture and operating logic to avoid retraining technicians.
-  **Modern Processing Power**
Powered by the NXP MCXE315 ARM Cortex-M7 processor.
-  **Future Supply Security**
Updated chipset alleviates obsolescence concerns.
-  **Enhanced Configuration**
New firmware to alleviate common failure modes and allow for more configurability.

The EMI 9.1™ Controller modernizes the trusted 4M2 architecture with a new ARM Cortex-M7 processor, enhanced diagnostics, updated component technology, and continued support for tens of thousands of installed systems as well as new projects.

APPROVED APPLICATIONS

- Private Residence Elevators
- Modernization & Retrofit Projects
- Accessibility Lifts
- New Equipment Platforms
